

Anubhav Kumar

Add. : Akshardham, New Delhi-110061 | C: 7696178953 | Email: anubhav.vihar@gmail.com

Career Objective:

Looking forward to work in a growth oriented organization where my energy, skills and enthusiasm can be utilized for achieving the organizational goal and simultaneously, it will help me in my professional growth.

Current work experience & responsibilities:

I have 6 years and 8 months of experience, contributing to the following companies.

GlobalLogic (Aug 2023-current date)

NODE.JS | ANGULAR | EXPRESS.JS | LINUX UBUNTU SERVER | VIM | AWS

Have been working with GlobalLogic for 1 years and 4 months as Associate Consultant on following projects.

Unified Security Portal is a centralized platform that integrates various security tools, systems, and information into a single interface. It allows organizations to manage and monitor their security operations more efficiently by providing a holistic view of their security landscape. This portal typically includes features like access control, video surveillance, intrusion detection, incident management, and reporting, making it easier for security personnel to respond to threats and incidents effectively.

The **Verizon Unified Security Portal** serves as a command center for an organization's security operations. It streamlines and consolidates various security functions, tools, and data sources, enhancing situational awareness and response capabilities.

I contribute to the Verizon project, working on the **Unified Security Portal and the SOE (System of Engagement) Portal**. My role involves utilizing Node.js, Angular, Express.js, and AWS to design and deploy scalable solutions. These platforms integrate security tools and enhance operational efficiency, situational awareness, and response capabilities for enterprise-level security management.

Valuebound pvt.ltd. (Feb 2022-Aug 2023)

NODE.JS | ANGULAR | EXPRESS.JS | LINUX UBUNTU SERVER | VIM | AWS

Had been working with Valuebound for 1 years and 6 months as SDE III (MEAN Stack Developer and AWS certified Developer Associate). Develop and use web-based APIs (especially REST-based APIs) using Express framework. Worked and working on multiple projects with multiple clients. Node JS with framework Express. Design, implementation, deployment and maintenance of innovative software solutions to transform service performance, durability, cost, and security using Node js , AWS and software engineering best practices to ensure the standard of quality of all team deliverables.

I served as an SDE III (MEAN Stack Developer), contributing to projects for clients like **Mankind and Mindtickle**. I specialized in Node.js, Angular, Express.js, and AWS to design, implement, and maintain scalable web-based APIs and software solutions. My work focused on enhancing performance, durability, and security while adhering to software engineering best practices.

Source Of Life Technologies India (Aug 2020- Feb-2022)

NODE.JS | ANGULAR | ANGULAR.JS | EXPRESS.JS | MYSQL | MONGODB | LINUX UBUNTU SERVER | VIM
